In Memoriam

Obituary for our editor Arthur W. Burks

We are saddened to report the recent passing of our colleague Arthur W. Burks, who has been a JCSS editor for many years. Professor Burks was a pioneer in Computer Science. He was a member of the team that designed the ENIAC computer and collaborated with John von Neumann on this and other projects. He was a co-author of the widely read paper by H.H. Goldstine, A.W. Burks and J. von Neumann which was influential in making the von Neumann architecture a standard design of computers world-wide. Professor Burks died on May 14, 2008 in Ann Arbor, Michigan. He was 92.
